JUNIOR CYCLE BUSINESS STUDIES - HOUSEHOLD BUDGET

Household Budget for Kingdavid Agbidi

The full loan term, July 2026 to July 2028. 24 monthly payments, then the loan is cleared (the last column shows the first month with no loan to pay).

Question. Kingdavid Agbidi, a Data Centre engineer in Dublin, already has a Credit Union loan with about 4,494 euro left (160 a month at 10.4%). In July 2026 he tops it up into one new loan of 30,794 euro from Palmerstown Credit Union to fit out the family home, at a lower 7.99%, repaid over 24 months (July 2026 to July 2028) at 1,393 a month. His take home pay is 4,400 a month and he pays no rent. Prepare his Household Budget for the full loan term and show how the loan is repaid by July 2028.

This is a top up, not a second loan. The old loan is rolled in, so he pays the old 160 one last time in July 2026 and it stops from August. On its own that old 4,494 at 160 a month would not clear until about March 2029. Rolled in here it is gone by July 2028, at a lower rate (7.99% vs 10.4%), and the same loan also pays for the whole home.

The credit card (1,500 limit). His day to day living goes on it, and he pays back in full each month exactly what he spent, leaving the rest. It never carries a balance, because his 4,400 wage covers the loan, the bills, pays the card in full, and still leaves 999.50. No interest, no debt, no risk.

How the loan is repaid by July 2028

The 1,393 covers it every month for 24 months. By July 2028 it is fully cleared (last column). Total repaid 33,432 (the 30,794 plus about 2,638 interest). From that month the loan payment is 0.

It is a top up (consolidation)

On its own the old 4,494 at 160 a month runs to about March 2029. Folded in here it also funds the home. The old 160 is paid a final time in July 2026, then stops.

Is it affordable?

Yes. Even with the repayment he keeps 999.50 a month (839.50 in the July 2026 overlap). Living rent free is the key, and his wage is a minimum that can be more, so the real cushion is bigger.

Credit card

1,500 limit, lived on day to day and topped up in full every month. He repays what he used and leaves the rest. No interest, no debt.

After July 2028

Once the loan is gone the monthly surplus rises to 2,392.50. Across the term he also banks about 26,220.50 of surplus.

Prepared for Kingdavid Agbidi - monthly net figures, July 2026 to July 2028. July 2028 is the first month after the loan is repaid. T Adderig Farm
